

Hi-Fi 2, Four Source, Four Zone.

The new Four Source, Four Zone (4x4) model is a compact version of the revolutionary Hi-Fi 2 distributed audio system, ideal for controlling, sharing and listening to audio systems in townhomes, luxury hotel suites, condominiums and small office buildings. The system can be controlled via the included remote control, from an included wall-mounted Volume Source Control, or directly by the free iOS applications.

The powerful yet compact Hi-Fi 2 plays music from devices you already own (or those you wish to purchase), and is so easy to operate that anyone can enjoy it. With Hi-Fi 2, you have the ability to listen to different sources at the same time at different volume levels throughout your home. Or set all zones to the same source and volume.

FEATURES

4 source, 4 zone system with all 4 zones amplified

Free iOS app

Utilizes a power brick with part numbers for US, UK, EU, and AU.

Cool-running digital amplification with 40 watts per zone

Includes 4 all-new VSCs and 2 RIMs

Equipped with both serial and Ethernet ports for control.

Hi-Fi 2 Four Source,
Four Zone (95A00-3)

ALL-NEW VSC (95A03-1)

HI-FI 2 RIM (95A04-1)

Main Assembly and Amplifiers

This is the most compact 4 zone, 160W system on the market today. Power output is 20W per channel at 8 ohms. It mounts directly into a Leviton Structured Media Center wiring enclosure at half-width. A variable line out amplification output is available for zone 1 (in addition to the built-in amps) as well as page/mute and system on jacks.

Volume Source Control

The Volume Source Control (VSC) features a keypad interface. The single gang Decora-style unit with 4 buttons adjusts volume and controls power and source. A white OLED display shows the source name, a volume bar chart, bass, treble, balance and other settings. Routed IR repeater function allows use of source equipment remote controls. A small hand-held IR remote provides

control of the Hi-Fi 2 from the comfort of an armchair. The VSC connects to the amp with a single Cat 5. 4 VSC's come with the Hi-Fi 2 4x4.

Remote Input Modules

There are 4 local inputs on the amplifier board for use with a broadcast, Internet, satellite radio tuners, and other sources. The 4 sources can either be local or via a RIM.

The Hi-Fi 2 4x4 accommodates four sources, which can either be local at the amplifier or remote using a RIM connected to Cat5. 2 RIMS come with the Hi-Fi 2 4x4 for the most popular remote inputs (home theater, kitchen TV, iPod dock, den entertainment center). More RIMs are available separately.

Technical Data Sheet

Hi-Fi2, Four Source, Four Zone. 95A00-3

Bluetooth RIM

Bluetooth RIMs exist so that you can wirelessly play streaming or stored music from your iPhone, iPad, tablet, notebook computer, etc.

Similar in function to Leviton's RIM, the Bluetooth RIM goes one step further by adding wireless connectivity. The device also features an input module for wired devices like radio tuners and DVD changers.

HAI Dock

The HAI Dock provides access to music on an iPod Touch or iPhone over a wired or wireless network. An iPod can be played in any audio zone connected to a Hi-Fi 2 system. Pull meta data (song, album and artist information) from your iPhone or iPod, and browse podcasts and playlists from a Touchscreen. To incorporate the dock, simply plug it in to a RIM or BRIM. Your device is not only shared, but also charges while docked.

App for iPhone, iPad, and iPod Touch

Leviton has developed stand-alone apps for controlling the Hi-Fi 2 4x4 system. Have total control over your audio experience by selecting a music source to play in a single room or throughout the entire home. Adjust volume levels throughout the home, change tracks, tweak bass/treble/balance and more. These apps are available free and have zero subscription fees.

Require more capability?

The 4x4 system provides a maximum of four zones and four sources of audio. If more capability is required, Leviton suggests the larger Hi-Fi 2 8 Zone, 8 Source system that provides 8 zones and 8 sources; however, it may be expanded to 16 zones and 8 sources. ■

Hi-Fi 2 Four Source,
Four Zone (95A00-3)

Hi-Fi 2 Four Source, Four Zone Product List

Hi-Fi 2 4x4 (Four Zone, Four Source) US Version	95A00-3 (US)	Hi-Fi 2 VSC Color Change Kit*	95A11-*
Hi-Fi 2 4x4 (Four Zone, Four Source) UK version	95A00-4 (UK)	Hi-Fi 2 Retractable Cables	95A13-1
Hi-Fi 2 4x4 (Four Zone, Four Source) EU version	95A00-5 (EU)	Hi-Fi 2 Retractable Cables	95A14-1
Hi-Fi 2 4x4 (Four Zone, Four Source) AU version	95A00-6 (AU)	Wired Dock for iPod Touch/iPhone	96A00-1

CONTROLLER (OPTIONAL)

Connect to controller or other serial port device. With a controller select zone and source and control volume and power from an OmniTouch Touchscreen or via controller program.

RIM
Part #95A04-1

- Remote Input Modules allow any source from anywhere in the house to be listened to in any or all zones.
- Use Cat5 cable from the RIM to Remote Audio In on the Hi-Fi 2.
- Add a max of 4 RIMs to the main board.

BRIM
Part #95A04-2

- Adds wireless connectivity to share streaming or stored music from smartphone, tablet, or computer.

VSC
Part #95A03-1

- Volume-Source Controls allow selection of source and adjustment of volume, bass, treble, balance and source gain. VSCs also feature an IR receiver.
- Use Cat5 cable from VSC to Zone Control In on the Hi-Fi-2.
- Add a max of 4 VSCs to the main board.

LOCAL AUDIO INPUTS

Attach audio sources that are in the same location as the Hi-Fi2 4x4 system.

VARIABLE OUTPUT

Attach additional amplification to Zone 1.

PAGE INPUT

When triggered, all zones turn on at the preset paging volume and switch to source 4.

SYSTEM ON OUTPUT

When any audio zones turn on, this output activates an auxiliary amplifier equipped with a voltage trigger.

ZONE SPEAKERS

Total of 4 on the main board. Use 8-Ohm speakers and 16-gauge speaker wire (4-conductor stranded suggested for neat installation).

ETHERNET NETWORK PORT

Communicate with IP devices on the network. Free iOS app for controlling with iPhone, iPad, and iPod Touch.
