

# HAI TECHNICAL UPDATES

## "Model 1106 Version 1.8 Update "

***ADD THIS DOCUMENT TO YOUR MODEL 1106 PC ACCESS MANUAL***

Version 1.8a of the Model 1106W PC Access Software supports the following features of the 1.8 firmware:

- Support for the Extended Code Level Command
- Support for Leviton Scene Control (*Special version of OmniPro firmware only - contact your dealer for information*)

### INSTALLATION

To install this software, run the PC Access setup program as follows:

1. Insert the Model 1106W PC Access Setup disk into your disk drive.
2. On computer running Windows 95, Windows 98, and Windows NT 4.0, select the **Run** command from the **Start** menu.

NOTE: On computers running Windows NT 3.51, open the Program manager, and choose **Run** from the **File** menu.

3. Type `<drive>:setup`

For example, if the Setup disk is in drive A, type "a:setup".

4. Follow the instructions provided on the screen.

When updating from the DOS version of PC Access, copy all account files with the extension of ".pca" and the configuration file "PCA.cfg" from the existing PC Access directory to the PC Access folder "C:\Program files\HAI\PC Access". This will ensure that the PC Access software will access your existing account files using your current security stamp and password.

### STARTING THE PROGRAM

To start the PC Access software, click the **Start** button, point to **Programs**, point to **HAI**, point to **PC Access**, then click **PC Access**.

If you experience any difficulties, you may call HAI during regular business hours for assistance.
